The Problem.

Hard water, contaminants, and buildup can cause more than just an inconvenience — they can affect your health, damage your home, shorten the life of your appliances, and leave you with higher costs over time.

From chalky fixtures and stained surfaces to unpleasant tastes and hidden impurities, water problems show up in everyday life — and they add up.

But it doesn't have to be this way.
At Infinity Water Tech, we're committed to providing advanced water treatment solutions that eliminate these challenges at the source, so you can enjoy cleaner, safer water and peace of mind every day.

THE INFINITY WATER TECH SOLUTION

ADVANCED FILTRATION. LASTING PERFORMANCE. A HEALTHIER HOME.

Our revolutionary, whole-home water treatment system uses a powerful blend of natural and advanced media to remove contaminants, reduce hardness, and deliver cleaner, safer, better-tasting water to every tap in your home.

CATALYTIC GRANULAR COCONUT SHELL BASED ACTIVATED CARBON (CX-MCA)

Reduces chlorine, unpleasant taste, and odor.

KDF 55 BACTERIOSTAT

Inhibits bacteria growth and reduces heavy metals.

ALDEX C-800 8% CROSS-LINK ION EXCHANGE RESIN

Reduces hardness-causing minerals.

BACKWASH WATER FLOW

Water flow completely separates filtering media in an innovative lift-and-spin motion. This process achieves more efficient cleaning with significantly less water flow compared to less sophisticated whole-house conditioners.

- REMOVES CHLORINE, ODOR AND UNPLEASANT TASTE
- REDUCES HEAVY METALS AND CONTAMINANTS
- SOFTENS HARD WATER
- RETAINS ESSENTIAL MINERALS

CLEANER WATER.
A HEALTHIER HOME.
A BRIGHTER TOMORROW.

WATER IS **LIFE.**

HOW IT WORKS

Our advanced whole-home water treatment system works 24/7 to deliver cleaner, healthier water to every tap in your home.

01

UNCONDITIONED WATER

Enters the media tank, coming into contact with catalytic carbon, Bacteriostat 55, and ion exchange resin to remove chlorine, contaminants, and hardness minerals.

02

CLEAN, TREATED WATER

Flows up through the system and is distributed throughout your home — cleaner, safer water from every tap.

03

BACKWASH WATER FLOW

Water flow completely separates the filtering media in an innovative lift-and-spin motion, providing a more efficient cleaning process with significantly less water usage compared to traditional systems.

04

REVERSE FLOW BRINING

A saltwater solution is pushed upward through the media to flush away trapped contaminants, restoring the system's performance and ensuring long-lasting efficiency.

A SMARTER SYSTEM FOR A HEALTHIER TOMORROW.
